PROFILE

I have knowledge in the following programming languages: Python, Typescript, Java, HTML, CSS and SASS. I can build applications with those languages and use them in frameworks such as: Angular, FastAPI and Django. I built an web page for a real company using Angular and the languages it supports. I'm also familiarized with the financial sector, I did a diplomat called Finanzas para no Financieros, and made two courses on the financial sector and analysis on the financial statements. So I can handle some stuff about the financial state of a company.

WORK EXPERIENCE

FRONT-END DEVELOPER Dec 2022

Mundo Cart Diesel Dec 2022

I made a web page for a company that sells spare parts and provides mechanical service for trucks. It was a responsive web site, with a working shopping cart and a hamburger menu. It has carousels and images, it also has a buying section where you can add the items you want to buy in the shopping cart

SKILLS

- Python
- Java
- Typescript
- Angular
- HTML
- CSS
- SASS
- Finances
